

BULLS SWING REPORT

KEY LEVELS 9-26-23

The price action today is weak as all three indexes fail to hold yesterday's potential oversold reversal candles. We now have new support levels to watch. Patience is the name of the current game.

In today's video we continue to review the new Watchlist. A good time to start watchlists fresh is after summer rangebound action with much sector rotation. You will notice there are a number of our regulars on this list, along with plenty of new low float stocks with strong accumulation patterns.

I will review 20-30 per day until we complete the entire list of 155 stocks.

Remember the watchlist is not necessarily all stocks with current potential entries. It is a list of strong stocks with potential setups. The Focus list is the more near term entries and is built from the watchlist.

Today we go over Artificial Intelligence and Retail stocks.

Today we review ISRG, IOT, IONQ, RELX, ANET, NOW, PLTR, AI, URBN, LULU, MELI, ANF, JILL, WSM, PDD, CASY, COST, SFM, TJX, MUSA, MYTE, CAL

BULLS SWING REPORT

VIX

VIX is popping today which indicates some fear in the markets. Remember for the market to breakout of the downtrend we don't want to see any spikes. Ideally VIX starts falling this week.
